- No risk of contamination from water, soap and towel
- Total protection even in perforated gloves
- Protection of natural skin film even with frequent use
- Protection of skin lipids thus avoiding exposure of resident flora

Salient Features

- Fragrance-free and Colourless
- Ethanol based, does not have the unpleasant odor associated with other alcohols
- Contains Chlorhexidine Gluconate which provides residual antimicrobial protection to hands
- Superior fragrance compared to competing products
- No stickiness – no glove tears
- Excellent emollients which leave the hand smooth and soft – no irritation
- Imported raw materials of highest quality
- Superior packing with imported Calibrated Pump
- Available in 100 ml & 500 ml packs

Directions for Use

Wash hands to remove coarse organic matter if any and dry. For best results use a CHG-compatible hand scrub such as Biochek® Scrub for washing.
Wash hands to remove coarse organic matter if any, and dry. Use undiluted.
Hygienic Hand Antisepsis: Rub Biochek®-CHG Classic, 2-3 ml (calibrated pump capacity is 2 ml per push) well over clean, dry hands and nail grooves for 30 seconds
Surgical Hand Antisepsis: Rub Biochek®-CHG Classic, 8-10 ml (calibrated pump capacity is 2 ml per push) well over clean, dry hands and nail grooves up to elbows for 5 minutes
Skin Antisepsis: Apply Biochek®-CHG Classic on operative and peri-operative skin regions and allow to dry for 30 seconds. Paint skin 2 to 3 times for best results
