Isopropyl Alcohol & Benzalkonium Solution

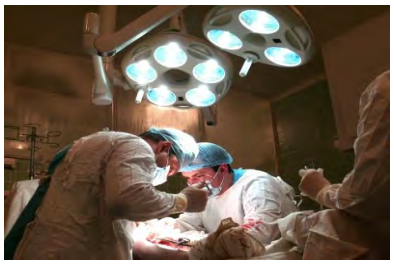
CUTAPREP®- RAPID

Antiseptic Paint

Composition

Each 100 g contains:

Isopropanol IP	63.00 g
Benzalkonium Chloride	0.025 g
(As Benzalkonium Chloride Soln IP)	



Applications:

For prepping and post closure of skin.
Has excellent cleansing and de-fatting effects.
Effective against microbes, bacteria (including Staphylococci Tuberculli), fungi, viruses(including Hepatitis B, HIV)

Salient Features:

- Marking of skin
- Rapid and effective disinfection of skin flora
- Prevents intra-operative growth
- Unique de-fatting property
- Deep penetration, inhibits intra-operative bacterial growth in the incision folds of the skin
- Rapid on-set and good residual effect
- Excellent skin tolerance
- No post procedural staining of skin
- Economical

Indications:

- Major Surgical Procedures
  Prepping, post-operative dressing and removal of skin sutures
- Minor Surgical Procedures
  Injections, blood withdrawals, catheterisation, arthroscopy and minor injuries
- Dermatological Application
  Eczematous infection of the skin and prophylactic against mycosis pedis

Directions for Use:

•Surgery

1. About 10 minutes prior to incision, paint the operative and peri operative area for 2 minutes with a sterile swab dipped in Cutaprep-Rapid (one swab for 2-3 bands)
2. Allow the area to dry (about 30 seconds)
3. Re-paint the entire area as before and allow to dry
4. Cover the disinfected area with sterile towels, leaving the incision site open

• Post-Closure

1. Gently apply Cutaprep-Rapid on and around the operative site, to clean it thoroughly.
2. Dress the wound with a sterile dressing moistened in Cutaprep-Rapid

• Minor Injuries: Cutaprep-Rapid is a complete antiseptic by itself. It needs no additional support.
• Cleaning and dressing minor lacerations, CLW, injection site etc.
• Preparation for invasive investigations (scopy, catheterisation etc.)
