

BIOCHEK[®] SCRUB

Chlorhexidine Gluconate Solution
Antiseptic Cleansing Solution

LAURYL SULPHATE FREE!
DOES NOT CONTAIN LAURYL SULPHATES

Composition

Chlorhexidine Gluconate Solution IP,
equivalent to Chlorhexidine

Gluconate 4.0 % w/v

Emollients

Moisturiser

Colours: Carmosine

Application

Biochek Scrub is complete
bactericidal, fungicidal hand and
body wash.

Selected ingredients and skin-care
substances make Biochek Scrub
particularly compatible with the skin
and at the same time endow it with
special antimicrobial and active
cleaning properties.

Salient Features

Selected ingredients and the
absence of alcohol make the
product considerably more tolerable
than the usual disinfection products.

Ensures

- Hand disinfection prior to surgery
- Routine use in wards to reduce the risk of cross infection.
- Whole body antisepsis.

Precautions

- Store in cool place.
- Protect from heat and light.
- Keep out of eyes and ears.

Directions for use

Antiseptic hand wash: Wet hands and forearms with water. Apply 4-5 ml (calibrated pump capacity 2 ml per push) Biochek Scrub, rub for 1 minute. Rinse thoroughly with water and dry.

Pre-operative skin antisepsis for the patient: Wash whole body in bath at least twice, usually day before and day of operation with 25 ml Biochek Scrub starting with the face and working downwards for 2 minutes, rinse with water. Repeat with further 25 ml including hair. Rinse thoroughly with water and dry with clean towel.
