

BIOCHEK[®] - SCRUB 2%

Chlorhexidine Gluconate
Topical Solution USP 2% w/v

LAURYL SULPHATE FREE!
DOES NOT CONTAIN LAURYL SULPHATES

Composition:

Chlorhexidine Gluconate Solution IP
Equivalent to Chlorhexidine Gluconate 2% w/v
Purified Water IP.....qs

Applications:

Biochek[®]- Scrub 2% is a complete bactericidal, fungicidal, virucidal hand and body wash

Ideal for:

- Routine use in wards as hand wash to reduce the risk of cross infection
- Whole body antisepsis for patients as a pre-operative body wash

Salient Features:

Selected ingredients and skin-care substances make Biochek[®]- Scrub 2% compatible with skin while giving excellent antimicrobial protection

Directions for use:

- Antiseptic hand wash: Wet hands and forearms with water. Apply 4-5 ml Biochek[®]- Scrub 2% (calibrated pump capacity is 2 ml per push) and rub for 1 minute. Rinse thoroughly with water and dry.
- Pre-operative skin antisepsis for the patient: Wash whole body in bath at least twice, usually day before and day of operation with 25 ml Biochek[®]- Scrub 2% starting with the face and working downwards for 2 minutes, rinse with water. Repeat with further 25 ml including hair. Rinse thoroughly with water and dry with clean towel.

Packaging:

- 100 ml
- 500 ml
