

HOSPAL[®] - PVSR

POVIDONE-IODINE STAIN REMOVER

FOR REMOVING POVIDONE IODINE STAINS FROM FABRICS

Hospal-PVSR is a highly effective stain removing agent for stubborn povidone-iodine spots on fabric. It acts on povidone-iodine spots, loosens its adhesion to the fabric and a subsequent detergent wash with **Hospal Linen Disinfectant** for fabrics gives optimum results.

Directions for Use:

Spray **Hospal-PVSR** directly onto the stained area. Allow the solution to act for 5 minutes. Use a brush or rub the cloth to remove any faint residual stains. Rinse thoroughly with water. Launder as usual using Linen Disinfectant.

Note:

1. Wash hands after using **Hospal-PVSR**
2. Do not use bleach / oxidizing agents for disinfecting laundry
