- Pre-surgical and post-surgical skin antiseptics.
- Prophylactic casualty procedures against infections of burns, lacerations and abrasions.
- Treatment of bacterial and mycotic skin infections.
- Protective antiseptic film under dressings, bandages or plaster casts.
- Hygienic & Surgical hand disinfection

Salient Features

- Contains Chlorhexidine Gluconate which provides residual antimicrobial protection to skin
- Rapid and effective disinfection of skin flora
- Prevents intra-operative growth
- Unique de-fatting property
- Deep penetration, inhibits intra-operative bacterial growth in the incision folds of the skin
- Rapid on-set and good residual effect
- Excellent skin tolerance
- No post procedural staining of skin
- Germ count on the hands remains low for several hours
- Does not affect sweat functions
- Destroys transient pathogens and resident skin flora
- Available in 100 ml, 500 ml, 1 Litre, 2.5 & 5 Litre packs

Directions For Use:

Use undiluted. Apply directly to skin.
Allow to dry prior to application of dressing, drape or cast.
Do not mix with detergents or other chemicals

Skin Antisepsis: Apply BIOCHEK-C2P on operative and peri-operative skin regions and allow to dry for 30 seconds before incision. Paint skin 2 to 3 times for best results.

Hygienic Hand Disinfection: Rub BIOCHEK-C2P, 2-3 ml (Calibrated Pump capacity is 2 ml) well over clean, dry hands and nail grooves for 30 seconds.

Surgical Hand Disinfection: Rub BIOCHEK-C2P, 8-10 ml well over clean, dry hands and nail grooves up to elbows for 5 minutes.

Packaging Options:
