

FUMIFLOOR® - ADVANCE

Aldehyde-free, Sporicidal Surface Disinfectant

Bactericidal, Fungicidal, Virucidal, Sporicidal

ALDEHYDE FREE!
DOES NOT CONTAIN ALDEHYDES

SALIENT FEATURES:

- Aldehyde-free - excellent safety profile
- Eradicates spores in just 30 minutes
- Formulated based on Quaternary Ammonium Compound with synergistic compounds
- Excellent material compatibility - contains corrosion inhibitors
- Contains surfactant for cleaning action
- Effective even with hard water

RECOMMENDED DILUTION:

- Sporicidal Action & Fumigation: Prepare & use 2% solution by adding 200 ml Fumifloor®-Advance to 10 Liters of water.
- Critical Care Areas: Prepare & use 1% solution by adding 100 ml Fumifloor®-Advance to 10 Liters of water.
- Semi-critical Areas: Prepare & use 0.5% solution by adding 50 ml Fumifloor®-Advance to 10 Liters of water.
- Non-Critical-Areas: Prepare & use 0.1% solution by adding 10 ml Fumifloor®-Advance to 10 Liters of water.

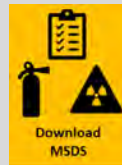

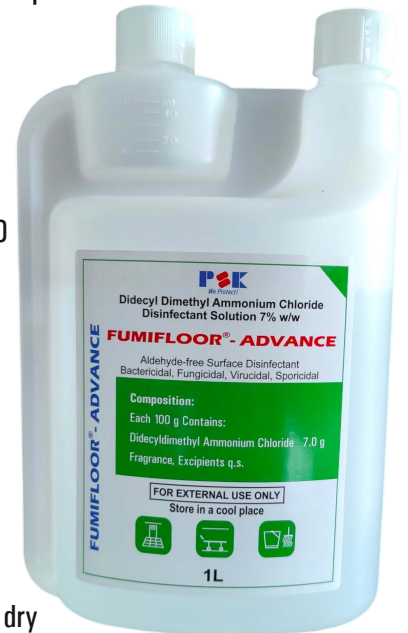

USAGE & CONTACT TIME:

- Fumigate using 400 ml of 2% solution for every 1000 cubic feet room volume, close room and allow to dry for 30 minutes
- Wet surfaces of tiled walls, surfaces, operation tables and floors evenly with duly diluted solution. After mopping, allow surfaces to remain wet for at least 15 minutes. For sporicidal action, allow surfaces to remain wet for at least 30 minutes.

COMPOSITION:

Each 100 g Contains:

Didecyldimethyl Ammonium Chloride 7.0 g
Fragrance, Excipients q.s.
